Innovation, IoT & Digital Enablers

Building Intelligent & Self-learning Workplaces

Our digital-first FM ecosystem integrates automation technologies like **IoT Sensors, Robotics, Remote Operation Centers** and **CAFM** tools to create real-time visibility, connected operations, and data-driven decision making for smart spaces.

Our IoT Ecosystem

Remote Operations Centre (ROC)

First-of-its-kind 24x7 central command hub enabling real-time monitoring of multi-site operations.

Robotics & Automation

Automated cleaning, landscaping and material handling. Sensor-driven replenishment and hygiene insights for washrooms, kitchens, meeting rooms and HVACs.

SaarthiFX

Unified 360° CAFM tool that integrates occupancy analytics, environmental monitoring, smart dashboards, automated workflows and compliance reporting.

Energy & Water IoT

Smart meters, load balancing, consumption analytics, leak detection, flow monitoring and conservation tracking.

Compliance & Cybersecurity Automation

Digital safety checklists, audit trails, privileged access controls and vulnerability assessments.

Occupancy & Asset Intelligence

Real-time seat usage, space optimisation, live asset health indicators and predictive alerts.

Sustainable FM Solutions

Your Partner in the Journey to Net Zero

Facility operations account for a significant portion of energy consumption, water use and waste generation. Sustainable facilities not only contribute to environment conservation, but also have a clear economic impact for businesses.

At Compass, sustainability is embedded into every operational layer to optimise operations, reduce carbon footprint and deliver measurable environmental value. We enable businesses to position themselves as progressive and responsible, enhancing brand reputation, reducing carbon footprint, supporting ESG goals and enabling a real shift to efficient and sustainable facility operations.

Impact

Reduce Energy | Water Consumption | Minimise Waste | Optimise Resources

Achieve Measurable ESG Outcomes | Green-certified Facilities

What We Deliver

Carbon Offsetting & Neutrality

Energy Management

Waste Management & Circular Economy

Water Management Solutions

Sustainable Cleaning & Indoor Air Quality

Green Building Enablement (LEED/IGBC)

Scope 1, 2 & 3 Emissions Coverage

Predictive Diagnostic Services

Uses advanced analytics, audits and condition-based monitoring to predict failures, extend equipment life and eliminate downtime.
